

## Gene Therapy Clinical Trials Resources

### Gene Therapy Review Database

The gene therapy review's own gene therapy clinical trials database is now live. You can search the database using simple mode, or limit your search by using the advanced search function. The database is structured to contain information on gene therapy drugs currently under clinical testing and a comprehensive list of all gene therapy clinical trials past and present.

The information for these gene therapy trials was obtained from Clinical Trials Gov, the Wiley database, Entrez Pubmed and local clinical trial repositories.

The database is now fully functional and all users are invited to register prior to browsing through the records. Registration will remain free and allows you to be informed of updates and improvements to the database and genetherapyreview.com website.

### Wiley Interscience

Wiley publishers provide an excellent resource on current clinical trials conducted worldwide. They maintain a database providing a wealth of information on individual trials and a selection of charts and tables summarising trials by different indicators.

### ClinicalTrials.gov

ClinicalTrials.gov is a registry of federally and privately supported clinical trials conducted in the United States and around the world. ClinicalTrials.gov gives you information about a trial's purpose, who may participate, locations, and phone numbers for more details. This information should be used in conjunction with advice from health care professionals.

### CancerConsultants.com

Cancer Consultants, Inc. is an industry pioneer that developed the oncology e-space. Cancer Consultants has been producing and distributing cancer information for patients and professionals since 1998. Since inception, Cancer Consultants has delivered educational programs and resources to over 18 million targeted seekers of cancer information. In 2003, Cancer Consultants' professional education division became OncoEd, Inc. A subsidiary of Cancer Consultants, OncoEd was developed with a focus on delivering quality professional educational programs to meet the unmet needs of oncology professionals. The educational activities on this site are powered by OncoEd, Inc.

### Research Centric

Research Centric is a resource for information about UK and EU medical research policy. This site contains information on clinical research trials, trials of medical devices, and many other areas of clinical research in the UK and EU. Other topics covered include Research Governance, clinical research by disease area as well as many other subjects. ResearchCentric is intended to provide a vital resource for research managers, investigators and commercial organisations.

### Current Controlled Trials

Current Controlled Trials allows users to search, register and share information about randomised controlled trials. Access to all the information on this site is free; charges for the registration services offered by Current Controlled Trials are available on request. This e-mail address is being protected

from spambots. You need JavaScript enabled to view it . Publication services are also available via the range of open access peer-reviewed journals published by our sister company, BioMed Central.

#### **UMIN-CTR**

The University Hospital Medical Information Network provides a search tool for looking up current clinical trials underway in Japan.

#### **Cancer Clinical Trials**

NCRI Clinical Trials has brought together the different UK registers of clinical trials and has developed a directory of information to provide patients, researchers and clinicians with information about current cancer trials in the UK. A number of different organisations provide information and resources for patients and scientists/clinicians. You may find that some trials information appears on more than one linked website. This is because although each register has been created for a particular purpose, some overlap between the information they provide may occur.

#### **NIH Clinical Center**

The NIH provide a search engine that indexes all the trials currently underway in their clinical center.

#### **Australia New Zealand Clinical Trials Registry**

The ANZCTR is an online register of clinical trials being undertaken in Australia and New Zealand. The ANZCTR includes trials from the full spectrum of therapeutic areas trials of pharmaceuticals, surgical procedures, preventive measures, lifestyle, devices, treat-

ment and rehabilitation strategies and complementary therapies. It has coverage all clinical trials involving Australian/New Zealand researchers or participants. Trials that do not involve Australian/New Zealand researchers or participants will be accepted if there is not a more appropriate national registry with which they should be lodged.
